

SUMMARY

I'm a fast-learning full-stack Web Developer with strong communication skills. After working in technical support, I found my passion for writing code and have been hooked ever since. I'm proficient in building RESTful web applications with JavaScript, jQuery, Angular.js, Ruby, and Ruby on Rails using Test Driven Development. I'm an enthusiastic problem solver with a compulsion to learn and grow.

EDUCATION

University of Iowa

BA Linguistics 2013

Graduated with Highest Distinction - GPA: 4.0

Bloc

Full Stack Web Developer Apprenticeship
2017

TECHNICAL SKILLS

JavaScript, Angular.js, HTML, CSS, Ruby, Ruby on Rails, jQuery, Bootstrap, Git, SQL, Microsoft Access

RECENT PROJECTS

Bloc It Off - (blocitoff.davidmhuebner.com)

Bloc It Off is a simple To Do list app built with JavaScript, Angular.js and Firebase that keeps to do lists clean and realistic by removing items that are not completed within 7 days. The idea is that if a task is not important enough to be completed within seven days, it does not belong on your to-do list. Expired to do items are still available under the Expired list, but they will be cleared from your Current to do list.

Wikiport - (wikiport.herokuapp.com)

Wikiport is a Wikipedia-like application built with Ruby on Rails that allows users to create public and private Markdown-based wikis. It features full user authentication/authorization and includes an option for users to upgrade to a premium membership with a one-time payment. A premium membership allows users to share their private wikis with collaborators. Payment integration is implemented through the Stripe API for maximum security.
